Location: Maribor, Slovenia

SUMMARY

Experienced Flutter Developer with 5 years of professional experience and a degree in Computer Engineering. Skilled in building intuitive, user-friendly mobile applications using Flutter and Dart. Proficient in RESTful APIs, Firebase, and Supabase integration. Follows clean architecture principles and adopts the MVVM design pattern to ensure scalable, maintainable, and production-ready code.

SKILLS

Flutter	REST APIs	Communication Skills
Dart	Version Control (Git/GitHub)	Problem Solving
Mobile Development	Firebase	Team Collaboration

PROFESSIONAL EXPERIENCE

 Corpay (via Ritech International AG)   **Jun 2024 - Present**

Senior Flutter Developer

PayByPhone, powered by
- Integrated Flutter as a module alongside native Android (Java) and iOS (Swift) frameworks, enhancing app performance and user experience.
- Developed features like secure payment options (Google Pay and Apple Pay), remote session extensions, and EV charging functionalities.
- Contributed to transforming the app into a comprehensive solution for parking and essential vehicle management, trusted by millions across 1,200+ cities globally.
- Helped turn the app into a full parking and vehicle management solution, used in 1,200+ cities worldwide, and reverted the entire native app to Flutter.

 Moxie Labs (Remote) | Digital Product & Marketing Agency   **Jun 2025 - Present**

Senior Flutter Developer (Freelance)

- Working on the Honeygrow mobile app, available on the App Store and Google Play, supporting food ordering, pickup, and delivery.
- Built features like menu browsing, order customization, secure checkout, rewards, and push notifications.
- Added support for live activities to keep users updated with real-time order status.
- Collaborating with the team to keep the app fast, reliable, and consistent with the brand.

Artichoke Holding GmbH (Remote)   **Sep 2023 - Jun 2024**

Flutter Developer

clubjam

- Developed a mobile app focused on pet health management.
- Features include nutrition tracking, subscription services, and worm testing management.
- Provided a comprehensive solution tailored for pet owners.

Corluna

- Built a cross-platform app for orchestras and music ensembles using Flutter.
- Implemented features like event scheduling, instrument rental management, and digital sheet music distribution.
- Delivered a seamless experience across web and mobile platforms.

Quantix L.L.C, Prishtine (Kosovo)   **Feb 2021 - Sep 2023**

Flutter Developer

BKS App

- Created a multifunctional app for accident certificates and insurance history in Kosovo.
- Integrated features for accident reporting, insurance coverage tracking, and European accident report assistance.
- Published on both the App Store and Play Store.

INSUREX SIP

- Designed and built an insurance claims app for the Kosovo Insurance Bureau.
- Streamlined claims processing with a focus on efficiency and user experience.
- Available on both the App Store and Play Store.

Ambra App

- Developed a task management app with task assignment and progress tracking capabilities.
- Ensured high-quality standards and timely delivery while enhancing user experience.
- Published on both the App Store and Play Store.

TrackerX

- Built a team management app with features for time tracking, progress monitoring, and communication tools.
- Utilized Firebase to ensure high-quality standards and cross-platform functionality.
- Accessible on web and mobile devices.

QHealth - QHealth Room Management and Session Management

- Developed two apps: Room Management for clinic scheduling and Session Management for provider-client interactions.
- Room Management app handled room usage, check-ins, and check-outs to improve operational efficiency.
- Session Management app supported diagnostics, syndrome selection, and audio recording for both group and one-on-one sessions.
