

ARDIT KONJUHI

Senior Flutter Engineer | Mobile Architecture, CI/CD, iOS & Android Delivery

+386 70 882 474 | arditkonjuhi8@gmail.com | Slovenia

Portfolio: konjuhi.github.io/ardit-konjuhi.portofolie

SUMMARY

Senior Flutter Engineer with 6 years of software engineering experience, including 5+ years focused on Flutter and delivering production applications across iOS, Android, and web. Experienced in mobile architecture, reusable white-label platforms, design systems, payment integrations, CI/CD, and App Store and Play Store delivery. Skilled in owning features from planning through production and collaborating with product, design, backend, and QA teams.

TECHNICAL SKILLS

Mobile: Flutter, Dart, iOS, Android, Java, Swift

Architecture: Clean Architecture, MVVM, reusable components, white-label architecture

APIs and Services: REST APIs, Firebase, Supabase

Payments: Apple Pay, Google Pay, mobile checkout

CI/CD: GitHub Actions, Codemagic, automated builds and releases

Engineering: Testing, code review, performance optimization, production debugging

UI Systems: Design systems, Widgetbook, cross-platform UI

Delivery: App Store, Play Store, release preparation, production support

PROFESSIONAL EXPERIENCE

MOXIE LABS (REMOTE) | DIGITAL PRODUCT & MARKETING AGENCY

Senior Flutter Developer | Jun 2025 - Present

FNGR Food and Hattie B's

- Developed FNGR Food as a reusable white-label Flutter food-ordering platform designed to support branded restaurant applications.
- Built Hattie B's as a branded food-ordering application on top of FNGR Food, adapting shared functionality to its brand and ordering requirements.
- Developed shared flows for menu browsing, product customization, group ordering, checkout, payments, rewards, and real-time order tracking.
- Structured reusable components and configurable app flows, making future branded restaurant app development easier and faster.
- Used GitHub Actions to automate validation and build workflows for Hattie B's and Sentry to monitor and investigate production errors.
- Collaborated with product, design, backend, and QA teams from feature planning through testing and release preparation.

Honeygrow

- Delivered production Flutter features for Honeygrow's iOS and Android application.
- Contributed to customer-facing flows for menu browsing, product customization, checkout, rewards, real-time order tracking, and iOS Live Activities.
- Used GitHub Actions for automated checks and builds, Codemagic for Honeygrow release automation, and Sentry for production error monitoring.
- Owned features from implementation and testing through release preparation and production support.
- Worked across product, design, backend, and QA to deliver reliable, performant experiences consistent with the Honeygrow brand.

CORPAY / PAYBYPHONE (VIA RITECH INTERNATIONAL AG)

Senior Flutter Developer | Jun 2024 - Mar 2026

- Worked as one of two main developers of PayByPhone's Flutter design system, developing reusable UI components in Widgetbook to standardize implementation across the application.
- Contributed to migrating PayByPhone from native Android and iOS implementations to a unified Flutter codebase, improving maintainability and delivery consistency.
- Developed Flutter modules integrated with native Android Java and iOS Swift code.
- Delivered Apple Pay and Google Pay integrations, parking-session extensions, vehicle management, and EV charging functionality.
- Contributed to a parking and vehicle-management application serving customers across more than 1,200 cities globally.
- Collaborated with mobile, backend, design, and QA teams on production features with high reliability requirements.

ARTICHOKE HOLDING GMBH (REMOTE)

Flutter Developer | Sep 2023 - Jun 2024

Corluna

- Developed a Flutter application for managing pet health and recurring care activities.
- Built nutrition tracking, subscription management, and worm-testing functionality.

clubJam

- Built a cross-platform Flutter application for orchestras and music ensembles.
- Implemented event scheduling, instrument rental management, and digital sheet-music distribution across mobile and web.

QUANTIX L.L.C | PRISHTINA, KOSOVO

Flutter Developer | Feb 2021 - Sep 2023

BKS Application

- Built accident-reporting, insurance-coverage tracking, certificate access, and European accident-report assistance; published on the App Store and Play Store.

Insurance Claims Application

- Designed and developed an application for the Kosovo Insurance Bureau that streamlined mobile claims submission and processing; published on both stores.

Ambra

- Developed task-assignment and progress-tracking functionality and owned mobile delivery through publication on the App Store and Play Store.

TrackerX

- Built a Firebase-powered team-management product with time tracking, progress monitoring, and communication functionality across mobile and web.

QHealth

- Developed room-management and session-management Flutter applications with scheduling, usage tracking, check-in/out, diagnostics, syndrome selection, and audio recording.

EDUCATION

Bachelor's Degree in Computer Engineering | 2017 - 2021

Faculty of Electrical and Computer Engineering
