

ARDIT KONJUHI

Senior Mobile Developer | Mobile Architecture, CI/CD, iOS & Android Delivery

+386 70 882 474 arditkonjuhi8@gmail.com Slovenia www.arditkonjuhi.xyz LinkedIn

TECHNICAL SKILLS

Mobile

Flutter, Dart, iOS, Android, Kotlin, Jetpack Compose, Swift, SwiftUI, UIKit, Storyboards

Architecture & State

Clean Architecture, MVVM, BLoC/Cubit, Signals, Riverpod, Provider, GetX, white-label architecture

APIs & Services

REST APIs, GraphQL, Firebase (Firestore, Cloud Functions, FCM), Supabase

Native & AI

Method Channels, Pigeon; Claude Code, Cursor, MCP workflows

Payments

Apple Pay, Google Pay, mobile checkout

CI/CD & Monitoring

GitHub Actions, Codemagic, build caching (CocoaPods/Gradle/Flutter), Sentry

Testing

flutter_test (unit, widget, golden), Mocktail, firebase_authmocks

UI Systems

Design systems, Widgetbook, cross-platform UI

Delivery

App Store, Play Store, release preparation, production support

EDUCATION

Bachelor's in Computer Engineering

Faculty of Electrical and Computer Engineering
2017 – 2021

LANGUAGES

Albanian — Native

English — Professional proficiency

German — Working proficiency

SUMMARY

Senior Mobile Engineer with 6 years of software development experience, including more than 5 years specializing in mobile development with Flutter, iOS, and Android, using Dart, SwiftUI, and Kotlin. Experienced in mobile architecture, reusable white-label platforms, design systems, payment integrations, CI/CD, production monitoring, and App Store / Play Store delivery.

PROFESSIONAL EXPERIENCE

MOXIE LABS (Remote) — Digital Product & Marketing Agency Jun 2025 – Present Senior Mobile Engineer — Freelance Jun 2025 – Mar 2026 · Full-time since Apr 2026

- Engineer and maintain production Flutter applications for the FNGR Food white-label platform (Finger Food white label) and major restaurant brands, including Hattie B's Hot Chicken and Honeygrow.
- Build end-to-end ordering flows: group ordering, menu customization, basket management, and payments using Signals and BLoC.
- Contributed customer-facing Honeygrow features including rewards, real-time order tracking, and iOS Live Activities.
- Integrated the Flybuy native SDK with Flutter using Pigeon, bridging Flutter with native iOS and Android implementations in Swift and Kotlin.
- Create reusable AI agent skills and workflows using Claude Code and Cursor, with MCP integrations for implementation, testing, debugging, and code review.
- Set up Sentry for production observability and GitHub Actions CI/CD to run tests, generate builds, and deploy releases to the App Store and Google Play Store.

RITECH INTERNATIONAL AG — Client: Corpay / PayByPhone Jun 2024 – Mar 2026 Senior Mobile Developer

- Worked on the PayByPhone mobile application for Corpay, serving customers in 1,200+ cities globally.
- Integrated Flutter features into the existing native iOS and Android applications using Method Channels, contributing to Swift and Kotlin code where platform-specific changes were required.
- Served as one of two primary developers of the Flutter design system, building 61 reusable components and documenting them in Widgetbook (component library, Corpay white label solution).
- Contributed to parking, EV charging, fuel prices, car insurance, and MOT and servicing features, including Apple Pay and Google Pay payments.

ARTICHOKE HOLDING GMBH (Remote) Sep 2023 – Jun 2024 Flutter Developer

- Developed Corluna for pet-health and recurring-care management (nutrition tracking, subscriptions, worm testing) using Riverpod.
- Built clubJam for orchestras and music ensembles — event scheduling, instrument rentals, and digital sheet-music distribution on mobile and web.
- Migrated backend from Supabase to Firebase (Firestore, Cloud Functions, FCM) for push notifications and cross-platform backend functionality.

QUANTIX L.L.C — Prishtina, Kosovo Feb 2021 – Sep 2023 Flutter Developer

- Delivered BKS and an insurance-claims app (accident reporting, claims submission and processing, Provider) — both published on the App Store and Play Store.
- Developed task-assignment and progress-tracking features for Ambra (GetX) and Firebase-powered TrackerX for team management, time tracking, and communication across mobile and web; integrated REST and GraphQL with backend systems.
- Built QHealth room- and session-management apps (Riverpod) covering scheduling, check-in/out, diagnostics, syndrome selection, and audio recording.
